SL LABS Investor Presentation · 2026

Real products.
Real revenue.
One token: $SL.

AI cardiac-risk screening and veterinary AI, settled in one credit on opBNB (BNB Chain Layer-2).

SL Smart Watch
Wellness ECG + AI

Argos Vet AI
Dental X-ray + ECG for vets

85,000+
Active ambassadors

2.0B $SL
Fixed supply · no re-issuance

SL Labs Pte. Ltd. (Singapore · UEN 202638264E) · Technology Partner: DIGIRAY Co., Ltd. (Korea) · Not investment advice

EXECUTIVE SUMMARY

A business first, a token second

SL Labs runs a revenue-first Health-Data DePIN on top of an installed base that already exists. Hardware is funded by the manufacturer, research by government R&D, operations by B2B revenue. **$SL funds none of these** — it is the one settlement credit for every AI service in the network.

50,000+
CR scanners shipped by DIGIRAY (cumulative)

~5,000
Veterinary clinics served by DIGIRAY

~1,000
Veterinarians signed up to Argos Vet AI

85,000+
Active ambassadors in the SL Labs community

0.88
ECG AI AUROC (clinical-research basis)

2.0B
$SL fixed supply, no re-issuance

DIGIRAY installed base is parent-company traction, never aggregated into on-chain protocol metrics.

THE PROBLEM

Three gaps we are built to close

Cardiac data is episodic

Most cardiovascular monitoring happens for a few minutes in a clinic, months apart. Day-to-day signal is never captured, consented or made usable for prevention research.

Vets read images alone

Veterinarians interpret dental X-rays and ECGs largely without accessible AI support, and suppliers lack a precise channel to reach them.

Health tokens sit outside revenue

Gen-1 projects extracted hospital data, funded hardware with token capital and decoupled the token from real business revenue.

OUR ECOSYSTEM

Two products. One settlement credit.

HUMAN · B2C

SL Smart Watch

Single-lead ECG smartwatch with AI cardiac-risk screening for everyday wellness. AI services paid in $SL.

Revenue: watch sales + AI service fees

$SL

opBNB · 2.0B fixed

VETERINARY · B2B

Argos Vet AI

AI reading of dental X-rays and ECG data for veterinarians worldwide, supporting their clinical work.

Revenue: advertising from vet device, pharma and pet-food companies

PRODUCT 1

SL Smart Watch

Hardware

Spec	Detail
ECG	Single-lead, 125 Hz
Sensors	ECG · HR · SpO_2 · skin temp · BP trend · steps
Battery	Up to 72 h continuous use
Durability	IP68 · 5 ATM
Connectivity	Bluetooth 5.2 + Wi-Fi · 1.3" AMOLED

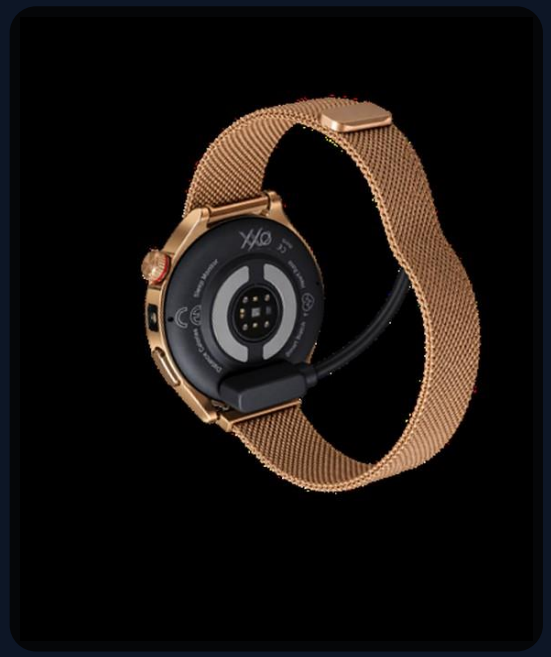

AI cardiac-risk engine (CNN-LSTM)

Item	Detail
Research	Gachon Univ. + SNUH clinical team
Data	204,000+ ECG segments, 2022–2026
Performance	AUROC 0.88 · Sens. 0.83 · F1 0.84
Inference	On-device, 10-second cycle
$SL price	10 SL cardiac monitoring · 5 SL wellness

Wellness device, not a medical device. Research-basis figures are not cleared-device performance. Medical functions only after MFDS clearance (filing 2026, clearance targeted 2027).

PRODUCT 1 · IN USERS' HANDS

SL Smart Watch + HealthFi app

Measure

Heart rate ~15 s · blood pressure ~40 s · single-lead ECG ~30 s. Automatic background heart-rate checks.

Guardian & SOS

Out-of-range readings alert family via Telegram, SMS or KakaoTalk. One-press SOS calls up to 5 contacts.

Points → AI analysis

5P per HR or BP reading, 10P per ECG (daily caps). Points will unlock the AI cardiac-risk analysis.

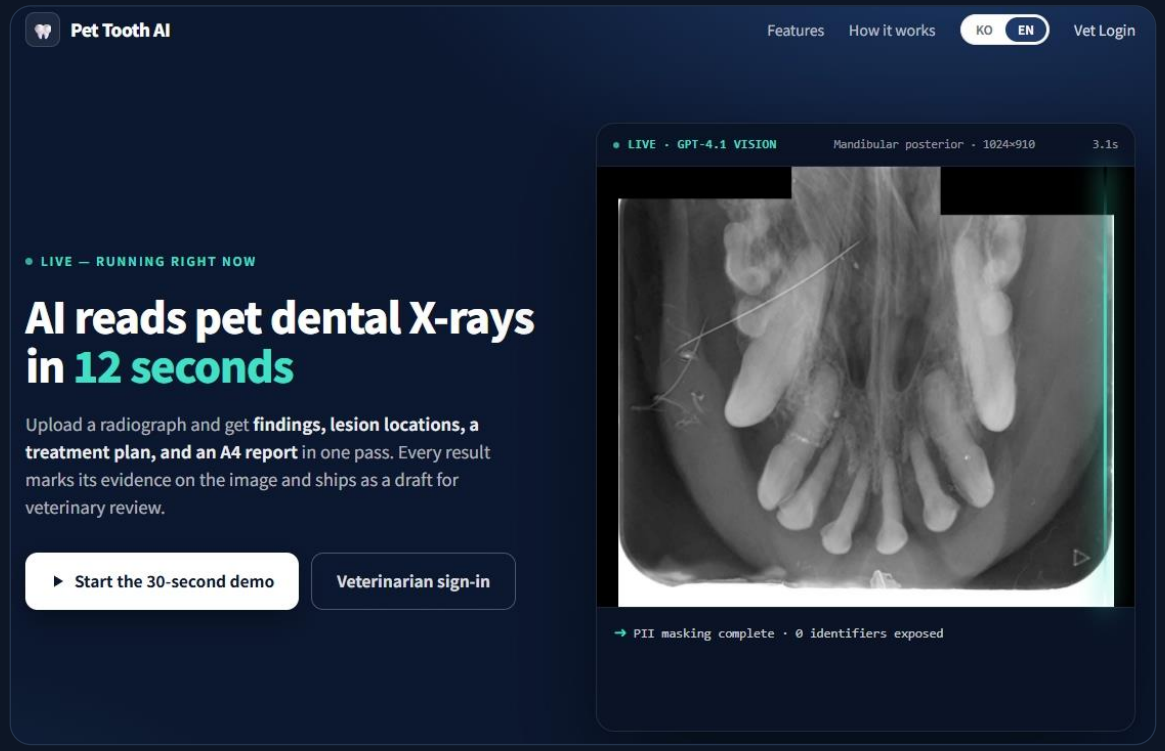

Live today

HealthFi v1.3.1 on iOS & Android · EN / KO / JA. Up to 7 days per charge, magnetic charging.

Wellness readings for reference only, not medical-device measurements · HealthFi published by DIGIRAY Corp.

PRODUCT 2

Argos Vet AI

A web platform for veterinarians worldwide: upload a dental X-ray or ECG and get findings, marked evidence, a treatment-plan draft and a report — always for the vet's review.

Free

~1,000 vets signed up

NEXT

Ads

Vet devices · pharma · pet food

Veterinary use sits outside human medical-device regulation.

REVENUE → $SL

Ecosystem revenue buys $SL every month

50%
of every SL Smart Watch sale

100%
of SL Watch AI service fees

100%
of Argos Vet AI revenue

EVERY MONTH

Open-market purchase of $SL on listed exchanges

EVERY MONTH

Public disclosure on the SL Labs website

Purchases are an operating policy; they create no holder right to revenue, dividend or equity, and no price level is promised.

TOKEN ECONOMY

Demand from a price list, not an airdrop

Service	$SL price
SL Watch · cardiac monitoring	10 SL per session
SL Watch · wellness screening	5 SL per session
Vet AI read (dental / ECG)	$0.1-equiv. (free in growth phase)
MediReport · LLM report drafts	Metered / credit pack
Institutional data access	Institutional credit (2027+)

10%

of every fee processed by protocol rule

Fixed

2.0B supply · no re-issuance · no swap

WCS (Wellness Contribution Score) is non-transferable; WCS→$SL conversion is disabled for Korea and the US. "Daily reads = daily credit demand" is published on-chain.

TOKEN DISTRIBUTION

2,000,000,000 $SL, fixed

Category	%	Amount	Lock & release
Treasury	20%	400,000,000	6-mo lock, then ≤20M per quarter with advance disclosure
VC Sale & Presale	15%	300,000,000	VC 280M: 18-mo cliff + 24-mo linear · Presale ≤20M: no lock
Team & Core	15%	300,000,000	12-mo cliff + 36-mo linear
Ecosystem Reserve	15%	300,000,000	12-mo lock, then governance-approved use case by case
Network Access Credit	10%	200,000,000	6-mo lock, then only against conversion demand (decay curve)
Liquidity Pool	8%	160,000,000	Unlocked at TGE · LP tokens locked 24 months
Participant Program	5%	100,000,000	6-mo lock, then 36-mo linear · each user grant locked 6 mo
Marketing	5%	100,000,000	20M at TGE · 80M over 24-mo linear
Advisors	2%	40,000,000	12-mo cliff + 24-mo linear
Protocol Reserve	5%	100,000,000	Burned at deployment (tx hash published)

After the deployment burn, on-chain total supply is 1,900,000,000 $SL.

TGE CIRCULATION

Low float, published unlocks

~10%

200M circulating at TGE = LP 160M + Marketing 20M + Presale 20M

~2%

Realistically sellable at TGE

~85%

Locked at launch

From TGE (late Dec 2026)	First release begins
+6 months (~Jun 2027)	Treasury (≤20M / quarter) · Participant Program · Network Access Credit Pool
+12 months (~Dec 2027)	Team & Core · Advisors · Ecosystem Reserve (governance-approved)
+18 months (~Jun 2028)	VC allocation begins 24-month linear release

LAUNCH PLAN

Presale to first listing in eight weeks

NOV 2026

Presale opens

Up to 20M $SL from the VC Sale & Presale bucket. No lock-up on presale allocation.

DEC 2026

Presale closes

Any unsold portion of the bucket is burned and the tx hash published.

LATE DEC 2026

TGE & first listing

160M liquidity pool, LP locked 24 months. On-chain dashboard live.

FROM JAN 2027

Monthly reports

$SL purchases and quarterly circulation disclosed on the website.

Any Korean domestic listing follows only after DAXA's four criteria and quarterly disclosure are met. Presale unavailable to Korean residents.

ROADMAP

Proof by proof

STAGE 0 · DONE

- 50,000 scanners shipped
- ~5,000 vet clinics
- 4-year ECG AI research
- 10,000+ interpreted images
- Smart-contract audit

Q4 2026

- Presale (Nov–Dec)
- TGE & first listing (late Dec)
- Argos Vet AI live (free)
- SL Watch wellness launch
- MFDS SaMD filing
- On-chain dashboard

2027

- Monthly $SL purchase reports
- Argos ad program [timing TBC]
- AI accuracy 0.85+
- MFDS clearance
- Insurer pilots · hospital B2B
- Japan · Southeast Asia

2027 H2 – 2028

- Data buyers: insurer → pharma / AI
- Verification nodes open
- DAO transition review

STRUCTURE & COMPLIANCE

Two entities, clear separation

DIGIRAY Co., Ltd.

KOREA · TECHNOLOGY PARTNER

Smartwatch manufacturing & sales · MFDS certification · hospital B2B · government R&D

SL Labs Pte. Ltd.

SINGAPORE · UEN 202638264E

$SL issuance · protocol & smart contracts · credit settlement · WCS→$SL conversion where permitted

Regime	Response
MAS (Singapore)	Functional utility credit; independent legal opinion; AML/CFT and travel rule addressed
MFDS (Korea)	SaMD filing in progress; wellness-only features before clearance
GDPR · HIPAA · PIPA	Consent-based, raw ECG stays on device, hashes on-chain, deletion on request
KR / US / CN	WCS→$SL disabled in Korea; US functions restricted; crypto disabled in China

RISK FACTORS

What could go wrong

Risk	Description
Regulatory	Virtual-asset and medical-device rules may restrict services
Classification	$SL could be treated as a security or regulated instrument in some jurisdictions
Certification	MFDS and other clearances may take longer than planned
Technical	AI accuracy is not guaranteed; audited contracts may still hold unknown flaws
Liquidity & float	Low initial float may increase volatility and price concentration
Business	Watch sales, Argos advertising and DIGIRAY plans may not proceed as expected

Not investment advice, an offer of securities, or a promise of returns or price. $SL is a functional access credit with no right to revenue, dividend or equity. SL Watch is a wellness device, not a medical device.

SL LABS

Revenue first.
Token second.

SL Smart Watch and Argos Vet AI earn the revenue. $SL settles it — and every monthly purchase is published.
